

TURN EASY SHEET (TES)

TURN EASY SHEET (TES)

The action of turning in bed can sometimes be difficult but with the help of this new **FITTED SHEET** with a centre panel of low friction satin, things are different.

Getting in and out of bed is also easier.

The sides and foot end are made of good quality, easy care material to help you from slipping off the side of the bed and to give a certain amount of grip to aid movement.

For the less able, there is an optional draw sheet. It has satin on the underside and remains in place for the patient to lie on. The two low friction surfaces working together enable a **CARER** to turn/roll or move the patient up or down the bed. This is accomplished without handling them, thereby facilitating anti-pressure practice where regular turning is required, the long (2 metre) draw sheet can be firmly tucked-in ready for the next move. It has been found that because the system is permanently in place there is no searching for a slide sheet, or worse, doing without altogether.

Using these sheets is as compliant with tissue viability requirements as it is with moving and handling procedure. Both products are made in our factory in the UK and are fully hot washable.

They are found to be very useful, not only in hospitals and nursing homes, but also in domestic situations.

The ease of turning takes the strain off the carer's back.

Positioning aids

Positioning aids

Prone Wedges

Used in the prone position to facilitate head, shoulder and arm movement. Made with combustion modified foam and FR wipe-clean vapour permeable cover. With carry strap.

Available in 3 sizes:

Size	Code	Length	Width	Height
Small	PWS	300 mm	300 mm	25/75 mm
Medium	PWM	650 mm	600 mm	50/175 mm
Large	PWL	650 mm	600 mm	50/250 mm

Postural rolls

Postural rolls are useful in various therapeutic activities for moving weight, rolling about balancing etc. Made with combustion modified foam and FR wipe-clean vapour permeable cover. With carry strap.

Available in 3 sizes:

Size	Code	Length	Diameter
Small	PRS	600 mm	200 mm
Medium	PRM	900 mm	300 mm
Large	PRL	900 mm	375 mm

T-roll positioning aid

The T-roll positioning aid has tubular shaped CMHR foam core. With a wipe-clean vapour permeable cover. T-shaped to give comfort and leg support when in a laying position. Zip-on cover enabling it to be removed and washed.

Uses:

- Positioning aid
- Support for hip abduction
- To position lower limbs
- General control of posture whilst lying supine.

Available in 5 sizes:

Name	Code	Size
Billy Paediatric	PPA	100 x 100 x 150 mm
Molly Small	PAS	150 x 150 x 510 mm
Annie Medium	PAM	150 x 200 x 710 mm
Archie Large	PAL	200 x 200 x 710 mm
Eddie Extra Large	PAEL	200 x 250 x 710 mm

Bed Wedges FWL

Many uses for this wedge include – A sitting up back rest, a pillow raiser, a foot raiser or a prone wedge. Made of polyurethane foam and covered in a vapour permeable wipe clean fabric.

Sizes:
61 x 61 cm
24 x 24 inches

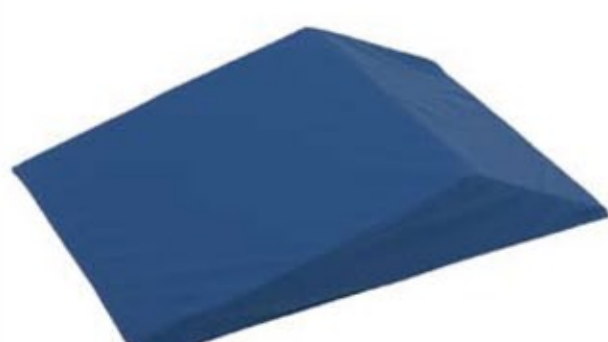

Small Wedge FWS

Small wedge covered in vapour permeable wipe clean material.

Size:
22 x 15 x 5 cm

The Double Knee Wedge KBW

This cushion simulates the action of a knee break on a profiling bed preventing the patient from slipping the bed at the same time reducing pressure on the heels. Covered in vapour permeable wipe clean material and has a non-slip base.
